

MAGMA (MAGM) FIREPAPER 🔥 v.3.3

[HTTPS://MAGM.RED](https://magm.red)

VERIFIED

MAGMA is completely verified on Algorand!

TOKENOMICS

MAGMA is a utility token, designed to be used by anyone. The symbol for MAGMA is MAGM. There will be 777 Million MAGM tokens in total supply with 10 decimal points on 21 blockchains, with a combined total of 16,317,000,000 MAGMA tokens.

microMAGMA is Sulfur or plural for Sulfura!

MAGMA is designed as a micro-transaction currency, fractions of MAGMA are called Sulfur or plural for Sulfura.

Alice receives 3 Sulfura that is 0.0000000003 MAGM, or if Bob receives 1 Sulfur and that is 0.0000000001 MAGM.

The symbol for MAGMA is ₡ and the symbol for Sulfur is ⚡, and they will be referenced as such in the example below.

Since ₡ has ten zeros after the decimal point, ⚡ is calculated as such.

$$₡ 1.0000000000 = ⚡ 10,000,000,000$$

$$\frac{1}{4} = M 0.0000000001$$

PROJECT FORKD

Not all of the details of Project Forkd are currently publicly available.

Project Forkd is a MAGMA expansion project and will provide the capabilities such as the smart bridging, which will allow for cross-chain swaps of MAGMA on any blockchain. Not only will it enable swapping MAGMA cross-chain, but it will allow the swapping of the parent tokens from those blockchains.

Example 1: SmartBridge Swap MAGM/ALGO → MAGMA, but it will also allow for ALGO → MAGMA.

Example 2: SmartBridge Swap MAGM/ETH → MAGMA, but it will also allow for ETH → MAGMA.

Example 3: SmartBridge Swap BTC → MAGMA, as well.

Here is the map of the infrastructure we have planned for MoltenChain, MAGMA's very own blockchain. These nodes will also host the Epic Online Services P2P node for The Verse.

CARDANO

777,000,000 MAGMA HAVE BEEN MINTED ON THE CARDANO BLOCKCHAIN.
We are working on this.

STELLAR

777,000,000 MAGMA HAVE BEEN MINTED ON THE STELLAR BLOCKCHAIN.
We are working on this.

ABOUT MAGMA

MAGMA has been developed by Redeaux Games to power economies within their games and other products. To learn more about Redeaux Games, go to their website at <https://www.redeaux.games>

Anyone can use MAGMA and can include it into their websites/app, projects, or games with ease. We are creating an entire API around MAGMA, so using it anywhere will be easy!

CROSS-CHAIN (SMARTBRIDGE)

We are developing a smartbridge system to enable cross-chain swaps between different blockchain networks.

The idea behind MAGMA is to create a super simple way for new or existing users to swap almost any currency into MAGMA!

For FIAT to MAGMA we are reaching out to MoonPay and Circle.

We will not make assumptions about when this feature will be available, but when we get close we will announce it on our website (<https://magm.red/>), and on our Discord server <https://discord.gg/v9ukSBWVa5>.

THE VISION

MAGMA will be the economy of an open source metaverse style game, coming out in the future. MAGMA will also be used in a new

music and podcasting streaming service that is currently being developed.

MAGMA will also have an independent DEX, wallet and NFT platform, with some features baked into The Verse.

We are currently working on these features, and it will take some time to do it. When we get more information we will update the Firepaper.

THEORIES: We are exploring different ways to be more stable and other possibilities with MAGMA.

FUTURE RELEASES

THE VERSE: The Verse is an open source metaverse style communication platform, featuring multiple multiplayer games developed by the users. MAGMA is the currency that will power the economy within The Verse.

EXPLODE: Explode is a music/podcast streaming platform, it offers the ability for fans to directly tip the artists or creators with MAGMA.

Explode will be streaming within The Verse, exposing the artists and creators to The Verse.

LIVINGRED: Is a social network both within The Verse and for reality. MAGMA will offer monetization for LivingRed.

MAGMA GIFT CARDS: We are developing a method for a MAGMA Gift Card service. We are putting together a proof of concept using Smart Contracts and a custom system allowing a user to purchase an amount of MAGMA, using their debit cards, bank transfers, PayPal, or any cryptocurrency. They can then send a QR code or hash ID to whomever they want to be redeemed.

The smart contract will create a buy order at the current market value and lock into escrow until the contract is redeemed with the QR code or hash ID. The smart contract will deposit the amount in escrow to their connected wallet.

THE VERSE

The Verse is a platform that uses MAGMA for play-to-earn, minting NFTs, tokenizing art, music, 3d models, virtual land, user created games and so much more.

More information will be available in the future, we will be working with a PR firm to help us launch The Verse and MAGMA to the moon.
